

Product Safety Recall

Do you own this product?

Mercury Marine 7.6L V12 500 hp SeaPro marine outboard engine

or

Mercury Marine V12 600 hp Verado marine outboard engine

Dates sold: 7 April 2022 – 19 July 2023

Why the product is recalled: The product may have a faulty steering sensor. If the sensor fails, the engine will enter 'guardian mode' which reduces the engine's power output and may reduce the steering capability of the vessel.

Hazard: Risk of injury and property damage from unexpected change to the boat's steering capability leading to a collision.

1. Consumers should stop using affected engines and contact their closest Mercury Marine V12 dealer to arrange to have it inspected and repaired if required. The repair involves replacing the faulty position sensor with a new sensor.

For more information contact Mercury Marine Customer Service by email on merc.info@mercmarine.com or by phone on 03 9791 5822 (Monday to Friday, 8.30am to 4.30pm AEST).
